

PLANIT

Strategic + Transport Town Planning

Professional Profile

Kip Tanner

Kip is increasingly interested in the interaction of our built environment with the impending changes to our transport systems. He is also particularly interested in the links between the built environment and our physical and mental wellbeing.

Kip has enjoyed 15 years working as a town planning consultant in Canberra. His focus on environmental assessments, sustainable design, active transport, community and recreation projects are aligned with his personal values and supported by his formal training as a Civil and Environmental Engineer.

Over the last 5 years he has competed in the national mountain bike marathon series, sailed in the lightweight sharpie nationals and spent plenty of time with his family. He is currently working out how to convert his 1961 Holden to run on electricity.
